

EXECUTIVE SUMMARY

Trim Masters Incorporated is being issued a source wide Conditional Major operating /construction permit for their automobile door panel manufacturing plant in Harrodsburg, Kentucky. The bulk of the facility's emissions come from adhesive spraying operations. The source is potentially major for VOC and HAP, but practically enforceable limitations in this permit will restrict VOC emissions to 90 TPY, and HAP emissions to 9 TPY and 22.5 TPY for single and combined HAP respectively.

New construction authorized by this permit is for 291 W Armrest Assembly line, Ornament Sub-assembly, Peterbilt Assembly Line and Kenworth Assembly Line.

In conclusion, a thorough analysis was made of all relevant information available pertaining to this application. A preliminary determination was made to approve the permit and public notice was placed in *The Harrodsburg Herald* in Harrodsburg, Kentucky on July 22, 2004. The comment period expired on August 22, 2004. The Division held a public hearing on August 23, 2004. Comments received during the public hearing are listed in Attachment D (Please see Attachment D for comments and responses). The comments did not warrant any changes to the draft permit or any of the supporting documents.
